iPad – Exporting photos and videos to storage drive with iPadOS by Joseph I (Hyper Support)

With the update to iPadOS, the HyperDrive for iPad Pro and the HyperDrive Power have become much more powerful tools for your uses. Here is how to export your photos to your storage drive (for privacy reasons, all photos have been covered with white/red squares):

Go to the photos app, find the photos/videos you want to select

Selected photos are represented by the red squares
